Across Europe, regions are developing new approaches to support the transition towards more sustainable and circular economies. Implementation, however, is never one-size-fits-all. It depends on local resources, industrial strengths, governance structures and community needs. BIO2REG and BioFairNet are therefore joining forces for a webinar on regional and territorial perspectives on bioeconomy implementation, bringing together regional authorities, practitioners and innovation actors to share what putting a bioeconomy strategy into practice actually involves.

WHAT THE SESSION COVERS

- Four regional pitches and two territorial case studies
- Practical examples of bioeconomy implementation on the ground
- Lessons learned from different European regions
- Opportunities for open discussion and peer exchange

WHO SHOULD ATTEND

Regional and local authorities, managing authorities and development agencies, bioeconomy clusters and industry representatives, researchers and practitioners working on circular value chains, policymakers and innovation actors, and organisations supporting the transition of carbon-intensive regions.

A detailed agenda and the confirmed speakers will be shared with registered participants closer to the event.

Please register in advance to receive the joining link.

BIO2REG is a Horizon Europe Coordination and Support Action supporting greenhouse gas-intensive regions in becoming bioeconomy model regions through a regions-to-regions approach.

BioFairNet is developing a digital cooperative network that supports the fair transition of carbon-intensive value chains in agriculture and mining through stakeholder engagement, digital innovation and knowledge exchange.
